

TOYOTA Traigo80

These high-tonnage models are extremely reliable in heavy-duty operations such as beverage production and ideal for handling multiple pallets simultaneously. Fulfilling the needs of the occasional and frequent user, the Toyota Traigo80 is essential in fleet operations and intensive applications as it offers superior performance and long operating times.

TRAIGO

Power
meets precision

Power meets precision with the Toyota Traigo80

True performance lies in balance of raw strength and refined control. The Toyota Traigo80 is engineered for heavy-duty and demanding indoor and outdoor applications, offering five models from 3.5 to 5.0 t (compact and standard, 500mm and 600mm load centers). Choose your power: the 80V battery, ideal for efficient, high-frequency operations or the High-Performance configuration option with a 90V battery, which features an IP54 high-performance motor, up to 12% energy savings, more gradeability and up to 30% lifting speed increase, delivering the extra muscle and durability needed for intense outdoor challenges. Precision is built in with advanced ergonomics, intuitive touchscreen controls and excellent visibility, ensuring comfort, confidence and productivity in every shift.

PRODUCTIVITY

ENERGY EFFICIENCY

ERGONOMICS

DURABILITY

High-performance option available

The 90V drivetrain and lift deliver more speed (20km/h), stronger acceleration, greater lifting power, extra gradeability on slopes and optimised regenerative braking while decreasing energy consumption. IP54-rated components ensure extra durability in tough conditions such as dust and rain.

Improve uptime and energy efficiency

Extended operating time with low energy consumption, along with a choice of Li-ion or lead-acid power options to better match your application needs. Smooth operations with fast charging (LIB), easy battery exchange and possibility to charge from the back of the truck (LAB).

Built and designed with the driver in mind

Equipped with the latest Traigo innovations and comfort features, intuitive controls, outstanding visibility and full floating driver compartment for low noise and vibration.

Durability at its core

Perfect for heavy-duty, demanding outdoor operations with higher IP protection and enhanced gradeability. Built for durability following the Toyota Production System (TPS).
